Validation (JOI, Express-
Validator)
C.DATABASE:
MongoDB, Mongoose
D.TOOLS & WORKFLOW:
Git, GitHub Postman, VS Code
NPM, VITE, Create React App
Cloudinary (For Image
Uploads)
Deployment (Render, Netlify,
Vercel)

**Soft Skills:**
Communication, Problem
Solving, Team Work, Time
Management

## Certificate

Saylani Mass Training Program:
FemHack-2025

## About me

Enthusiastic and results-driven MERN Stack Web Developer Intern with solid experience in building full-stack applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing clean, responsive, and user-friendly interfaces using React, HTML, CSS, and modern UI libraries like Bootstrap and Tailwind CSS. Proficient in consuming APIs, managing application state, and implementing authentication. Strong understanding of frontend performance, component-based architecture, and backend integration. Passionate about writing clean code, collaborating in agile teams, and delivering impactful web solutions.

## Education

**2024-2028**
Dawood university of Engineering and Technology
BS Artificial Intelligence

**2023-2025**
Saylani Mass IT Program
Web and App development course

**2021-2023**
Usman Public Secondary and Higher Secondary School
Intermediate (Pre-Medical)

**2019-2021**
The Educators
Matriculation (Science Group)

## Projects

**1. E-Commerce Website (MERN Stack)**
Built a full-featured eCommerce platform with product listing, cart functionality, user authentication, and admin panel. Implemented secure user login/register system using JWT and bcrypt Used React for frontend with responsive design and dynamic product pages Integrated Cloudinary for image upload and MongoDB for product storage Added protected routes, cart count, and product management features.
🔗 GitHub: https://github.com/Rija2005/my-ecommerce-website

**2. Employee Management Dashboard**
Developed a role-based employee dashboard with separate features for admin and employees. Features: Attendance tracking, profile management, leave requests, salary view Backend with Express, MongoDB, and validation using Joi Frontend built with React, Tailwind CSS, and React Icons Used Axios for API calls and react-toastify for notifications.
🔗 GitHub:https://github.com/Rija2005/Employee-Manage-System

**3. Weather App (React.js)**
Created a responsive weather application using a public API. Fetched and displayed real-time weather data based on user input Used React Hooks and custom CSS for interactive UI
